shahhets108@gmail.com | **LinkedIn** | **GitHub** | **Portfolio** | **LeetCode** | **Codeforces**

EDUCATION

Nirma University Expected 2028
Bachelor of Technology in Computer Science and Engineering CGPA: **9.35**

Relevant Courses: Relational Database Management Systems (RDBMS), Object-Oriented Programming, Data Structures and Algorithms, Operating Systems, Computer Architecture, Artificial Intelligence, Machine Learning

SKILLS

Technical Skills	Data Structures, Algorithms, Object-Oriented Design & Programming (OOP), HTML, CSS, DBMS, MySQL, PostgreSQL, MongoDB, REST APIs, Operating Systems, Tailwind CSS
Frameworks	React, Node.js, Express.js, Next.js, Socket.IO, Django
Languages	Python, C++, JavaScript, TypeScript, Java, C, SQL
Tools	Git, GitHub, Linux, Jupyter Notebook, Kaggle, Supabase

EXPERIENCE

Blink Analytics — Full Stack Developer Intern — Serin AI **June 2026 – August 2026 — Ahmedabad, India**

- Engineered a real-time AI interview platform using **LiveKit** with shared media sessions, bandwidth testing, client-side recording, and interview integrity monitoring.
- Built production-grade full-stack features using **Next.js**, **TypeScript**, **TanStack Query**, **Supabase**, and **PostgreSQL**, including **PostgreSQL Row-Level Security (RLS)** and type-safe data flows, delivering role-based profiles, authentication, notifications, and analytics dashboards.

Computer Society of India — Executive Member **January 2025 – Present — Ahmedabad, India**

- Led a team of **40+ executives** to organize **Cubix 2026** for **400+ participants** across **6 competitive events**.
- Coordinated event planning, logistics, volunteer management, and cross-functional teams to ensure the seamless execution of all competitions.

PROJECTS

CodeArena - 1v1 Coding platform — GitHub Link

- Engineered **real-time matchmaking and synchronized battle rooms** using **Socket.IO**, supporting live 1v1 coding contests with **JWT-authenticated, role-based access control**.
- Designed a **15+ endpoint REST API** with modular controllers, services, and middleware using **React, Node.js, Express.js, PostgreSQL,** and **Prisma ORM**, powering leaderboard generation and submission tracking under concurrent gameplay.

SuryaKiran – AI Solar Inverter Predictive Maintenance Platform — GitHub Link

- Developed an **AI-powered predictive maintenance platform** for solar inverter fleets using a **multi-model ML ensemble** (Random Forest, XGBoost, LightGBM, CatBoost) achieving **87% fault prediction accuracy**. Built a **real-time monitoring dashboard** using **React**, **Tailwind CSS**, **Node.js**, **Express**, and **PostgreSQL** with **multilingual support for 8+ languages**.
- Implemented **real-time anomaly detection** and **future failure prediction** from inverter telemetry data, along with **root-cause analysis** and an **LLM-powered assistant** to generate maintenance insights and diagnostics through natural language queries.

TransitOps – Fleet Management & Analytics Platform — Live | GitHub Link

- Developed a **production-grade fleet management and dispatch platform** using **React, Vite, Zustand, Axios, Node.js, Express, Prisma ORM,** and **PostgreSQL**, implementing **6 modular backend services** for vehicles, drivers, trips, maintenance, and fuel records, along with role-based fleet operations, interactive route mapping, and analytics dashboards.
- Designed a **secure modular architecture** with routes, controllers, and services, featuring **JWT authentication**, role-based authorization, **Prisma transactions**, and **10+ REST APIs**, enabling atomic workflow transitions across fleet entities while powering real-time analytics dashboards for fleet utilization and operational insights.

LEADERSHIP & TEAMWORK

- **Odoo India Hackathon** | **Team Lead** • Selected as a **Finalist (Top 350 teams)** among **8,500+ teams** and **20,000+ participants**. Led project development, technical architecture, and team coordination.
- **Odoo** × **Gujarat Vidyapith Hackathon** | **Team Lead** • Selected as a **Finalist (Top 65 teams)** among **500+ teams** and **2,500+ participants**.
- **HACKaMINeD Hackathon** | **Team Lead** • Our team ranked **Top 10 in our track** among **2,300+ total hackathon participants**. Led backend development and system design while coordinating implementation across the team.

ACHIEVEMENTS

- **LeetCode** - Solved **450+ DSA problems**. Weekly 425: Ranked **6,736** out of **36,000+** participants. Max Rating: 1617 (Profile Link)
- **Competitive Programming** • Codeforces Round 1065: Ranked **5,709** out of **35,000+** participants. **Pupil** on Codeforces (Profile Link) (Max: **1201**). Solved **850+ competitive programming problems** across multiple platforms.
- Winner, Nirma University Inter-Department Coding Contest
